Agriculture is the science and art of cultivating plants and livestock. Agriculture was the key development in the rise of sedentary human civilization, whereby farming of domesticated species created food surpluses that enabled people to live in cities. The history of agriculture began thousands of years ago. After gathering wild grains beginning at least 105,000 years ago, nascent farmers ...

History. The development of farming over the course of China's history has played a key role in supporting the growth of what is now the largest population in the world. Analysis of stone tools by Professor Liu Li and others has shown that hunter-gatherers 23,000–19,500 years ago ground wild plants with the same tools that

would later be used for millet and rice.

Agricoltura is the culmination of multiple projects I've worked on in the past related to the sensing and control of agriculture systems, notably HydroPWNics and SunLeaf. Agricoltura aims to unite all the concepts of those past projects into a new system based primarily on RS485 nodes for control of pumps, sensor sampling, and light control. The base system will be a gateway controller linked ...
