Bing: All The Pump Know How

A pump is a device that moves fluids, or sometimes slurries, by mechanical action, typically converted from electrical energy into Hydraulic energy. Pumps can be classified into three major groups according to the method they use to move the fluid: direct lift, displacement, and gravity pumps. Pumps operate by some mechanism, and consume energy to perform mechanical work moving the fluid. Pumps operate via many energy sources, including manual operation, electricity, engines, or wind power, and

The Importance Of The Pump: Anthony Catanzaro Is Here To ...

It's purely mechanical -- and ingenious. Near the tip of the nozzle is a small hole, and a small pipe leads back from the hole into the handle. Suction is applied to
