Layouts Part of Android Jetpack. A layout defines the structure for a user interface in your app, such as in an activity. All elements in the layout are built using a hierarchy of View and ViewGroup objects. A View usually draws something the user can see and interact with. Whereas a ViewGroup is an invisible container that defines the layout structure for View and other ViewGroup objects, as ...

Top Android IDEs for Developers - Developer.com

Many of those developers find the Android platform particularly attractive for several reasons. First, Java is the native programming language for Android. Because Java is the world's most popular programming language, a lot of developers already know it. That means they don't have to acquire an entirely new skillset when writing Android apps.

Layouts | Android Developers

Let's explore some best practices in designing and developing Android apps. For starters, when you develop an Android application, you should prepare it to be run on a wide variety of devices and circumstances. Every Android device is a family in itself. When one member of the family goes haywire, it means the rest of the family is also likely to be affected.
