sharing the same transmission characteristics and/or VoIP and signaling resources, such as a Media Processor board or a C-LAN.

Application Notes for Vocera Platform with Avaya Aura ...

Server, Avaya Aura™ Communication Manager runs on an Avaya S8300 Server with Avaya G430 Media Gateway, and Cisco Unified Communications Manager runs on Cisco network appliance. The results in these Application Notes should be applicable to other Avaya servers and media gateways that support Avaya Aura™ Communication Manager.

Avaya Communication Manager Network Region Configuration Guide

Every IP endpoint on an Avaya Communication Manager system belongs to a network region. By default all IP endpoints are in network region 1, and if left as such they would all share the same characteristics defined by network region 1, and use the same resources. But in many cases this is not sufficient, and
