Engineering Goals: Discuss how to make supports for the bridges using trusses and arcs. Leader Instructions/Tips: Create a "ocean" with two "land masses" on either side to use as the testing station. We used a sink, but two chairs across from each other would also work. This way students can come up and measure how big their bridge will need to be.

Arch – An arch is the main structural component, which is always located below the bridge, never above it. The core component of the arch bridge is its abutments and pillars, which carry the weight and force of the entire bridge structure. Beam – This bridge is the most simple and thus was the first type of bridges to be built historically. One or many horizontal beams span an area between ...

Building Bridges - Tammy Enz - Google Books

The Rochester Bridge Trust is an ancient charity which was founded in 1399 to provide crossings of the River Medway in Kent. It owns the two road bridges and a services bridge at Rochester and part of the Esplanade. The bridges and roads are provided free of charge to the public. The Trust is led by the Wardens and Assistants of Rochester Bridge.

Young Engineers: Building Bridges Young Explorer: Young ...

Fantastic! One of my fondest memories was competing in a toothpick bridge contest in high school. I still feel I got as much out of hands on engineering projects in high school (R/C planes, skateboards, etc.) as I got out of the my engineering course work in college and grad school. Kids building stuff = *much* better engineers.
