WebEx URL API - Cisco Community

The WebEx XML API employs a services oriented architecture (SOA) to provide comprehensive services to external applications wishing to interact with one or more WebEx services. Teleconference Service Provider (TSP) API: The TSP API provides full-featured XML-based integration with audio conferencing networks.

Cisco Webex Xml Api

Inside of WebEx and Cisco components, the XML API now provides a new way to sign in with the CI access token for both user and machine accounts, only for service-to-service calling. This new support is provided by the new element <accessToken>, the CI access token in the sign in process. Note: The feature is only for WBS31 (XML API v11.0.0).

Cisco WebEx API Source Code Samples | ProgrammableWeb

The nature of XML-based WebEx APIs requires the construction of many intricate XML elements, which can be tediuous to build in a robust, succinct fashion. The webex-api-client alleviates these pain points through a Builder that provides flatter and simplified objects to be used for XML construction.

Webex - Cisco Webex Meetings API Updates Overview (API 40)

The API for downloading recordings is slightly separate from the other APIs mentioned above in that it falls under the NBR Web Services API. Specifically, it is the getNBRStorageFile API call outlined under the API Functions. The Webex API for this is currently SOAP based and as such we have to pass it XML.
