## **Animal Cell Culture: Introduction, Types, Methods and ...**

Animal cells and plant cells are similar in that they are both eukaryotic cells. These cells have a true nucleus, which houses DNA and is separated from other cellular structures by a nuclear membrane. Both of these cell types have similar processes for reproduction, which include mitosis and meiosis. Animal and plant cells obtain the energy they need to grow and maintain normal cellular function through the process of cellular respiration.

## **Animal Cell Culture: History, Types and Applications**

Animal cell culture is one of the major tools now in the field of life science. It is the in-vitro technique where the cells are grown in the laboratory conditions by providing a proper nutrient source, growth factors and the environmental factors for the cell growth and division. In the Animal cell culture, the cells are obtained by either enzymatic action like Trypsinization or mechanically by Mincing or Chopping.
