COVID-19 ICU Design Award. The COVID-19 ICU Design Award honors a critical care unit that was built or heavily modified from late 2019 through May 2020 to expand ICU bed capacity. The ICU design should be configured to provide care for COVID-19 patients as well as to ensure staff safety. This new award, available in 2020 only, has been conceived to identify and recognize a critical care unit that might not have been in operation before the COVID-19 pandemic.

Design for Critical Care: An Evidence-based Approach ...

When designing a critical care unit, the demands on the architect or designer working together with the interdisciplinary team of clinicians are highly specialized. Good design can have a hugely positive impact in terms of the recovery of patients and their hospital experience as a whole.

ICU Design and Staffing • LITFL • CCC

The traditional design of critical care units has been influenced by reliance on a single paper medical record, central monitors, and regulations promoting a single, centrally located workstation from which all beds within the unit can be observed. These conditions are changing as information systems allow the digital record to be in multiple places at once, interdisciplinary care teams become more prevalent, nursing moves closer to the bedside, families become more involved in patient
