Amazon.com: Dictionary of Human Neuroanatomy eBook: Hirsch ...

Neuroanatomy is the study of the anatomy and organization of the nervous system.In contrast to animals with radial symmetry, whose nervous system consists of a distributed network of cells, animals with bilateral symmetry have segregated, defined nervous systems, and thus we can begin to speak of their neuroanatomy. In vertebrates, both the internal structure of the brain and spinal cord ...

Dictionary of Human Neuroanatomy | Martin C. Hirsch | Springer

The auditory system is the sensory system for hearing in which the brain interprets information from the frequency of sound waves, yielding the perception of tones. Sound waves enter the ear through the auditory canal. These waves arrive at the eardrum where the properties of the waves are transduced into vibrations. The vibrations travel through the bones of the inner ear to the cochlea.
