CCTV Security Systems | Surveillance Cameras | CCTV ...

Digital security cameras on IP-based CCTV systems, on the other hand, record the images digitally to begin with. Then, they can receive and send data over a computer network rather than going through a DVR first. This method nixes the boxy setup with multiple ports in favor of an NVR, which is typically a simple software program that can be run on a device dedicated solely to operating the NVR or on a complete system.

Security Cameras DVR Recorders | Shop CCTV Security Pros

It's a system with analog security cameras that send the signals to a DVR (Digital Video Recorder) usually located in a rack or a surveillance room. This type of system is not purely analog because there is a conversion of analog signals to digital, it is, in fact, a hybrid system , but it is very common to hear technicians referring to this ...
