The EBA project has benefitted our community with practical expertise and knowledge of how to protect and preserve our environment using nature based solutions, allowing nature to restore nature,” said Mr Gonzalves Pool, Chairperson of the project’s Caiman Watershed Committee.

## **Bing: Ecosystem Based Adaptation Community Environment**

In the ecosystem-based adaptation cycle there are three main components, all of which relate to operational understanding of ecosystems and the benefits they provide. First, there are ecological structures such as trees, wetlands and green roofs.

## **Daily updates: CBA14 - The 14th International Conference ...**

Ecosystem-based Adaptation (EbA) is a nature-based solution that harnesses biodiversity and ecosystem services to reduce vulnerability and build resilience to climate change. In order to achieve the Sustainable Development Goals, reach global biodiversity targets and effectively address climate change, nature-based solutions should be treated as integral to adaptation strategies at global, national and local levels .

## **Community-Based Adaptation - Climate Change Adaptation**

This book makes a case for ecosystem-based adaptation by arguing that ecosystems and its

services are critical in the climate change and disaster risk reduction fields. Consequently, the monitoring and regulation of ecosystems need to be linked to a regular governance and institutional mechanism and be reflected in a more action-oriented agenda.

## **Ecosystem-based adaptation | UNEP - UN Environment Programme**

Ecosystem-based Approaches to Climate Change Adaptation, or Ecosystem-based Adaptation (EbA) involves a wide range of ecosystem management activities to increase the resilience and reduce the vulnerability of people and the environment to climate change. Climate change magnifies the existing risks and vulnerabilities associated with disasters, due to changing patterns of some hazards and due to increased population exposure and land-use changes.

## **Ecosystem-based Approaches to Climate Change Adaptation**

Experiences from practitioners on how to anchor Ecosystem-based Adaptation in networks, policies and sectors such as insurance, agriculture, water and infrastructure: This learning brief is a result of the 4th international EbA Community of Practice Workshop that was conducted by GIZ between 11 and 14 June 2019 at UNU-EHS in Bonn, Germany.

## **Ecosystem-based Adaptation**

Ecosystem-based adaptation (EbA) is an approach that uses these ecosystem services as part of a holistic adaptation strategy. Often through win-win outcomes, EbA protects vulnerable communities from extreme weather while simultaneously providing a variety of ecological benefits so crucial for human well-being, such as clean water and food.

### **Ecosystem-based adaptation project reduces flood risk in ...**

Photo gallery shows how ecosystem-based adaptation is helping communities respond to COVID-19 Farmers in La Mojana, Colombia, are using agrobiodiversity to cope with floods and droughts. During the COVID-19 lockdown, when travel is restricted and transport of goods disrupted, these climate-resilient gardens are providing a local source of ...

### **International EbA Community of Practice - Adaptation Community**

Drawing on an analysis of the economic and social benefits from ecosystem-based adaptation approaches, the project will support the Higher Council for Environment and Natural Resources to advocate for the integration of EbA approaches into key sector policies (e.g. agriculture, land and water) and national development plans to enable wider replication of such activities in other regions.

## **community-based-adaptation | International Institute for ...**

Ecosystem-based approaches for adaptation and community-based adaptation (CbA) are often closely linked and should be mutually reinforcing. Many examples of ecosystem-based approaches are locally managed and appropriate, and are informed by local and traditional knowledge.

### **Ecosystem service - Wikipedia**

Ecosystem-based adaptation ( EBA) encompasses a broad set of approaches to adapt to climate change. They all involve the management of ecosystems and their services to reduce the vulnerability of human communities to the impacts of climate change. The Convention on Biological Diversity defines EbA as “the use of biodiversity and ecosystem services as part of an overall adaptation strategy to help people to adapt to the adverse effects of climate change”.

### **Publications Archive - Adaptation Community**

Ecosystem services are the many and varied benefits to humans gifted by the natural environment and from healthy ecosystems. Such ecosystems include, for example, agroecosystems, forest ecosystems, grassland ecosystems and aquatic ecosystems.
