The psychological term for jumping to conclusions is “inference-observation confusion”, which is defined as when people make an inference but fail to label it as one, ignoring the risk involved. The inference-observation confusion happens when we fail to distinguish between what we observed first hand from what we have only assumed.

Conclusions - The Writing Center • University of North ...

This kind of conclusion includes extra information that the writer found or thought of but couldn't integrate into the main paper. You may find it hard to leave out details that you discovered after hours of research and thought, but adding random facts and bits of evidence at the end of an otherwise-well-organized essay can just create confusion.
