Bing: Fundamentals Of Neural Networks Architectures

Let's understand this. The input to each neuron are like the dendrites. Just like in human nervous system, a neuron (artificial though!) collates all the inputs and performs an operation on them. Lastly, it transmits the output to all other neurons (of the next layer) to which it is connected.

[1]Laurene Fausett - Fundamentals of Neural Networks ...

If any neuron in a layer (for instance, the layer of hidden units) is connected to a neuron in another layer (say, the output layer), then each hidden unit is connected to every output neuron. The arrangement of neurons into layers and the connection patterns within and between layers is called the net architecture.

Fundamentals of Neural Networks: Architectures, Algorithms ...

Neural Networks follow different paradigm for computing. The von Neumann machines are based on the processing/memory abstraction of human information processing. The neural networks are based on the parallel architecture of biological brains. Neural networks are a form of multiprocessor computer system, with
