Bing: Girls Who Code Learn To

Research shows that around age 12 both boys and girls have a similar level of interest in computer science. This difference is that women are half as likely to be encouraged to explore it. That's especially important considering that students who are told by a parent or a teacher that they'd be good at the subject are up to 3x more likely to be interested in learning CS in the future.

Learn | Code.org

Thought Catalog, a crowdsourcing website, contains an article that defines the rules of "girl code." Girl and Guy code is the idea that there are guidelines that a girl or guy must follow in order to be an ideal friend. The difference between the two is simply just the rules each gender must follow.
