User focused testing is the job of the Google TE. Assuming that the SWEs and SETs performed module and feature level testing adequately, the next task is to understand how well this collection of executable code and data works together to satisfy the needs of the user. TEs act as a double-check on the diligence of the developers.

Jeff Carollo is a software engineer in test at Google and has been responsible for testing Google Voice, Toolbar, Chrome, and Chrome OS. He has consulted with dozens of internal Google development teams helping them improve initial code quality. He converted to a software engineer in 2010 and leads development of Google+ APIs.

Bing: How Google Tests Software

In an article from 2011, InfoQ reports Google's testing department is relatively small for the amount of developers but

works well because, like Facebook, every engineer is responsible for their own code's tests. Google's achieved this by creating a culture of testing, and not an abstract, disconnected testing department.

Google Testing Blog: How Google Tests Software - Part Two

How does Google get by with such small ranks of test folks? If I had to put it simply, I would say that at Google, the burden of quality is on the shoulders of those writing the code. Quality is never "some tester's" problem.

Book Review: How Google Tests Software | Henrik Warne's blog

The book starts off by describing the key roles at Google: SWE (Software Engineer), SET (Software Engineer in Test) and TE (Test Engineer). Briefly, the SWE builds features for Google's products, the SET develops testing infrastructure and larger-scale automatic tests, and the TE tests the products from a user's perspective.
