If voicemail is that mission critical the customer should invest in VM Pro. Embedded isn't really intended to be a powerhouse voicemail system. It is for very basic functions on a small system. But that is just an opinion. Dermis and feline can be divorced by manifold methods.\* \*(Disclaimer for all advise given)--'Version Dependent'

The IP Office has some fantastic tools to troubleshoot issues, however, when you are working on a system that uses embedded voicemail, your options are very limited. There is usually no computer working as an email relay or logging what happens. It's time to pull out the old standard troubleshooting tool that has stood the test of time - Monitor.

From what I can gather, we have an Avaya Ip 500v2 system. I am using IP office manager 10.1. When logged, at the very top it shows IP office manager (our phone number) [8.1(65)] [Administrator(Administrator)]. The voicemail tab under system says: VM type: Embedded Voicemail, Vm Mode: IP Office Mode. Messages button goes to Visual Voice is ticked.

It's not often that we do pre-recorded menus for an embedded auto-attendant. It's fairly straight forward when doing it with Voicemail Pro -just make sure the WAV file is in the right format and point the component within to use the file. Recently, a client asked me to load pre-recorded audio greetings for an auto attendant.
