Irrigation Water Power And Water

Until recently, landowners in the area received irrigation water through an open ditch that spilled into a shared pond. From the pond, the water was distributed through an old pipeline pressurized by a 30-horsepower pump. This single pump irrigated 5 properties and was frequently in need of maintenance and repair.

Redlands Water and Power

Irrigation modernization—and the ongoing evolution of agricultural practices more broadly—is at the nexus of water, energy, food production, environmental stewardship, and rural economic resilience. The modernization of irrigation and water infrastructure presents opportunities for agricultural, environmental, economic, social, and energy benefits that can be achieved through a number of different approaches.
