## Setting up an Audio Interface - Ableton

With an analog setup, you'd be working with a 16- to 24-channel audio snake with a cable run of 100+ feet. A drum kit may have 8 to 12 microphones set up to capture the sound, so a dedicated sub-snake allows for shorter mic-cable runs and a much cleaner stage setup. Stage Sub-Snakes.

### **Creating a Livestream Setup for Live Performance | PreSonus**

The cables used to connect components of a sound system have three wires (conductors), similar to the three prong plug used to supply power to grounded electrical equipment. The electrical circuit used to pass a signal between sound equipment is 'balanced'. This means that two of the three conductors are dedicated to carrying the 'hot' and 'cold' path for the circuit carrying the ...

### **The Basics of Live Sound: Mixing for Beginners**

The easiest way to record your band for a live stream is to use a mixer with stereo recording capability. This will allow you to create a live mix (much in the same way you create a mix for a live performance). If your band is already gigging and rehearsing, chances are you're already looking for a good mixer.

### **Live Sound with Jon Lemon: From the Studio to the Stage ...**

The Mixing Console – The nerve center of your live sound setup! Mixers come in all sorts of different shapes and sizes with an assortment of knobs, faders, and switches. The first thing to remember is that each channel on a mixer is identical and each vertical line

of knobs and faders is called a channel strip.

### **How To Make A Stage Plot / Input List For Your Band**

You will need a dual channel analyzer like Smaart, SATlive, SysTune, Tuning Capture, RiTA, Open Sound Meter, etc.. Here are the speakers we need to set up: (2) CQ-1 (wide coverage main), (2) 650-P (2x 18-inch sub) in an uncoupled symmetrical point destination array.
