### Optimal Levels of Pollution - 2667 Words | Bartleby

Optimal Levels of Pollution Using the words “optimal” and “pollution” in the same sentence may appear daunting to many, however when the notion of an “optimal level of pollution” is fully explained, it appears more logical and applicable to our current global pollution problem. In his book, “People or Penguins: The Case for Optimal Pollution”, William Baxter makes several astounding points which lead us to the conclusion that zero pollution is not feasible, therefore we must ...

### Optimal pollution level: a theoretical identification - CORE

Exercise 5.1 Optimal Pollution. If there is an optimal level of cleanliness, then there is also an optimal level of pollution. If the marginal cost of pollution abatement is just equal to the marginal benefit from pollution abatement, then we have reached the point where society's welfare has been maximized with respect to environmental quality.

### Optimal Pollution Level A Theoretical

In this paper, the optimal pollution level is identified under the assumptions of linear, quadratic and exponential cost functions. The corresponding optimal level of environmental policy is evaluated, with analytical forms in the linear and quadratic case, while in the exponential case, these values are obtained approximately.

### **Optimal Pollution Level A Theoretical Identification**

What Is the Optimal Level of Pollution? On a theoretical plane, the question has not been properly answered. Its neglect may be partly explained by its seeming obviousness. And though the answer is indeed obvious once it is correctly stated, it is not the answer one gleans from a reading of the relevant literature.

Optimal level of pollution. intersection of MDC and MCC graphs, minimize total waste disposal cost any deviation in either direction would not be cost effective It is only beneficial to spend \$1 on MCC if incremental benefit arising from MDC exceeded or equaled \$1. baseline/benchmark pollution.

Downloadable! This paper identifies the optimal pollution level under the assumptions of linear, quadratic and exponential damage and abatement cost functions and investigates analytically the certain restrictions that the existence of this optimal level requires. The evaluation of the benefit area is discussed and the mathematical formulation provides the appropriate methods, so that to be ...

## Optimal Pollution Level A Theoretical Identification

The optimal level of pollution theory by Baxter is a tug-of-war of costs. It is about balancing those costs with our current situation in order to do the best that we can for the environment.

## Determining the 'optimal' level of pollution (PM2.5 ...

Economic theory suggests that the optimal pollution level occurs when the marginal damage cost equals the marginal abatement cost. Graphically the optimal pollution level is presented in Figure 1 where the marginal abatement ( $MAC=g(z)$ ) and the marginal damage ( $MD=\phi(z)$ ) are represented as typical mathematical cost functions.
