## **Collaborative Internet of Things C-iot : For Future Smart ...**

Abstract: With the Internet of Things (IoT) becoming the infrastructure to support domain applications, IoT search engines have attracted increasing attention from users, industry, and research community, since they are capable of crawling heterogeneous data sources in a highly dynamic environment. IoT search engines have to be able to process tens of thousands of spatial-time-keyword queries per second, making query throughput a critical issue.

### **Collaborative Internet Of Things C**

As the network of objects/things embedded with electronics, software, sensors, and network connectivity, Internet of Things (IoT) creates many exciting applications (e.g., smart grids, smart homes, smart cities) by enabling objects/things to collect and exchange data so that they can be sensed and controlled.
