Replica stone tools of the Acheulean industry, used by *Homo erectus* and early modern humans, and of the Mousterian industry, used by Neanderthals. (Top, left to right) Mid-Acheulean bifacial hand ax and Acheulean banded-flint hand ax. (Centre) Acheulean hand tool. (Bottom, left to right) Mousterian bifacial hand ax, scraper, and bifacial point.

Stone Tool Technology of Our Human Ancestors — HHMI ...

The making of stone tools is a characteristic that archaeologists use to define what is human. Simply using an object to assist with some task indicates a progression of conscious thought, but actually making a custom tool to perform that task is the "great leap forward". The tools that survive down to today were

made of stone.

Stone Tools in Human Evolution: Behavioral Differences ...

In Stone Tools in Human Evolution: Behavioral Differences among Technological Primates, John Shea employs a comparative analytical approach. He assesses how the evolution of behavior differs between humans and non-human primates to determine how we should classify the earliest period of tool production and use.

New stone tools analysis challenges theories of human ...

It was a crucial turning point in human evolution when Homo sapiens —or one of our species' hominin relatives —first controlled fire not only as a safeguard from predators, but also for sculpting tools from stone. Now scientists believe they have found evidence of this level of mastery.

Stone Tools In Human Evolution

Acheulean stone tool Tools also provide evidence for human evolution . Primitive tools (flint hand axes) have been found in remains from the Palaeolithic Age (10,000 to 2.5 million years ago).

Human evolution - Refinements in tool design | Britannica

Stone tools are an indication of cognition of early humans. Studying language and toolmaking is not an idea original to me. There have been studies on it. I fell into this psychology lab at Iowa, which was a developmental psych lab where they were interested in infant working memory, the development of cognitive features in children and infants.

The Q&A with Shelby Putt: Piecing together human evolution ...

Chapter's were short and lack the "bridge" for formulation of the cognition development of man through the use of stone tools. We now know early man was a lot more advanced in the tool use and development that originally thought, which would reflect greater cognitive abilities much earlier.
