Suicide Risk Assessment And Management

It refers to the identification, assessment, intervention, and treatment of a person at risk of suicide. It is an ongoing process whether due to a mental illness or a life crisis. Traditionally the term "suicidal behavior" refers to a suicide attempt, an episode of nonfatal self-harm, a suicide plan, and suicidal ideation.

Bing: Suicide Risk Assessment And Management

There are important principles for mental health staff to consider in the assessment and management of people at risk of suicide. Suicide risk assessment should always be followed by a comprehensive mental health status examination. While there is no single prescribed standard of care or clinical approach for situations involving suicide and self-harm, Working with the suicidal person recommends a series of general practices and principles to guide the assessment and management of people at ...
