How Green Buildings Should Look: Ken Yeang

This book presents Ken Yeang's work on the design of ecologically responsive skyscrapers, and includes his essay on applying green-design principles to the

skyscraper typology, as well as a preface by Steve Featherstone, an introduction by David Scott (Chairman of The Council on Tall Buildings and Urban Habitat) and a critique by Professor Ivor Richards.

The Green Skyscraper By Ken

For a hundred years the skyscraper has been the strongest of brands. Doubters have had little or no impact on architects, most of whom seem to have assumed that God put them here to erect the tallest skyscraper, the most intelligent skyscraper, or, In the case of Ken Yeang, the greenest skyscraper.

Green Buildings 2019 | Green Skyscrapers

The Green Skyscraper: The Basis For Designing Sustainable Intensive Buildings. Although many designers have succeeded in applying ecological or "green" design principles to architecture on the small scale, city centers remain an uncharted frontier when it comes to achieving integrated, ecologically responsive buildings.

Books by Ken Yeang (Author of The Green Skyscraper)

Yeang work on the high-rise typology as 'vertical green urbanism' (c.1990's)

sought to reinvent the skyscraper as 'vertical urban design'. [4] His ideas invert the high-rise typology as a 'city-in-the-sky', first exemplified in the National Library Singapore (2005).

The Green Skyscraper: The Basis for Designing Sustainable ...

Ken Yeang has become synonymous with the term "the green skyscraper". The Malaysian-born architect has changed our perception of the high-rise, questioning every premise on which it was founded. It has long been assumed that skyscrapers, as high consumers of energy and materials, cannot be sensitive to ecological and environmental issues.
