### **The Lorette system of pruning - Louis Lorette - Google Books**

At the time I mentioned that I was planning to use a Modified Lorette system of pruning in an effort to develop the best possible network of fruiting spurs without over-taxing the trees. This is a pruning method that seeks to establish a network of short, fruiting spurs along the length of a tree's main branches, which makes it suitable for ...

## **Bing: The Lorette System Of Pruning**

I've been looking into the Lorette system of pruning. This method would not be suitable for larger orchards, but might have potential for the small hobbyist with a small number of apple trees, especially in a backyard orchard. Maybe pear trees. Lorette pruning was developed in France in the early 1900s by Louis Lorette. I have not found a downloadable or buyable copy yet, but here it is on ...

## **The Lorette system of pruning. - CAB Direct**

Louis Lorette; who was an arborist and the curator and professor of an agricultural school in Wagnonville, France, developed a system of pruning fruit trees that involves summer pruning only. It maximizes fruit production in the orchard through an espalier system.

## **Modified Lorette System Pruning, Summer 2017 - Notes from ...**

Like many growers, Ian uses a modified Lorette system of summer pruning apple trees. This was devised by French grower Louis Lorette at the beginning of the 1900s and translated by William Dykes (a botanist) into English in 1925. The book Ian mentions, The Lorette System of Pruning, is difficult to obtain and will set you back at least £60!

## **The Lorette System of Pruning by Louis Lorette - 1946**

The Lorette pruning system became quite popular in Europe during the first half of the twentieth century, as growers sought to increase production using limited resources. The principle feature is that no pruning is done in the winter. Trees are only summer pruned.

## **Lorette System of Pruning - General Fruit Growing ...**

Summer pruning: the Modified Lorette System . This system is the most widely used method of pruning bearing cordons and is started in the second year. In mid-summer-apples generally about a week later than pears - cut back mature laterals growing directly from the main stem at three leaves, not counting the basal cluster.
