A Mobile Agent Approach for Ubiquitous and Personalized ...

Active wearable systems need to be comfortable, light, user-friendly, and power efficient. The identified research trends reveal that research on battery technology lags compared with research on other wearable system components (Figure 10). This implies that energy efficacy and efficiency remain an important design concern, both for wearable ...

Ebook: Wearable eHealth Systems for Personalised Health ...

The integration of PHMSs in healthcare implies their interconnection with health information systems (HISs) and electronic health records (EHRs). The most important requirement arising from this is the need for interoperability between PHMSs and HISs/EHRs. The potential of wearable and portable PHMSs to enable the shift to citizen-centered personalized care has been demonstrated through the work carried out under the European Commission's Fifth and Sixth Framework Programmes.

IOS Press

Personalised healthcare is not only about treating and preventing disease for individual patients. It is also about rethinking the healthcare system for future generations. Personalised medicine can deliver efficiencies that will keep healthcare systems sustainable in the face of rising costs. But the systems will need to evolve as well.
